Message from the Section Vice Presidents

We look forward to our 2020 Combined Sections Meeting in Coronado. Thank you to our Program Chair, Paul Willging, MD who, together with the program committee, has assembled an innovative program including panels, papers and video sessions of interest to all otolaryngologists-head and neck surgeons, who are in community based practice or affiliated with academic institutions.

The Hotel Del Coronado is located on picturesque Coronado Island, just a short distance from downtown San Diego. The Hotel Del has much to offer attendees and their families.

We look forward to welcoming you to our meeting in Coronado and are confident that our scientific forum will meet all of your expectations. Your participation in the meeting is essential for its success.

ABOUT THE TRIOLOGICAL SOCIETY

The American Laryngological, Rhinological and Otological Society, Inc. aka the Triological Society, was founded in 1895 in New York, NY. In the 124 years since its founding, the Triological Society has attracted the best and the brightest in academic and clinical otolaryngology. Membership in the Triological Society brings the distinction of being elected to the most prestigious society in otolaryngology. Active Fellowship is achieved by presenting a thesis in the field of otolaryngology considered acceptable to a panel of peers. For those entering the field of otolaryngology, the Society provides role models. For those who are committed to research and related scholarly activity, the Society offers fellowship with like-minded peers who share common values, interests, and concerns.

The mission of the Triological Society is to encourage and assist otolaryngologist-head and neck surgeons and other healthcare professionals to develop, maintain, and enhance their knowledge and skills in their pursuit of improved patient care through education, research, and fellowship.

- The Society disseminates scientific information by presenting the latest basic science and clinical information at scientific meetings and through publication of its scientific journals, The Laryngoscope and the open access journal, Laryngoscope Investigative Otolaryngology.
- The Society promotes research into the causes of and treatments for otolaryngic diseases by attracting promising physicians to scholarly otolaryngology research and supporting their development, providing financial support for the research efforts of young scientists, and promoting the highest standards in the field of otolaryngology-head and neck surgery. The Triological Society has awarded more than $5 million in research grants and now awards in excess of $450,000 annually.
- The Society publishes the monthly award-winning newsmagazine, ENTtoday, which reports timely and relevant news about otolaryngology-head and neck surgery, ready to be used by all those involved with the full spectrum of disorders of the head and neck and related structures.
- The Society advocates for support of residents through the Resident Research Award competitions at the Combined Sections meetings.
- The Society advocates for residents, fellows and medical students by offering travel awards for residents, fellows, and medical students chosen to make podium and poster presentations at Triological Society meetings.
